As the editorial management team of the Journal of Tehran University Heart Center, we are deeply honored to connect with our readers, contributors, and the broader scientific community.

We are thrilled to announce a pivotal moment in our journal's journey: its rebranding to Research in Heart Yield and Translational Medicine (RHYTHM). This change reflects two key objectives. First, we sought a name with greater international appeal, moving beyond the geographical constraints of our former title to align with our growing global audience and influence. Second, the new title better represents our expansive scientific scope, covering all facets of cardiovascular medicine from foundational basic research and clinical investigations to translational medicine, innovative therapies, and their real-world impact. RHYTHM embodies the heartbeat of innovation in cardiovascular science, mirroring our commitment to advancing discovery and improving patient outcomes worldwide.

To our valued readers and contributors: rest assured, this rebranding does not alter our journal's esteemed heritage or current indexing status. All archived volumes, published articles, and past achievements remain unchanged, preserving the legacy of the Journal of Tehran University Heart Center. Above all, our dedication to upholding the highest standards of scientific excellence and ethical integrity remains unwavering.

Moving forward, we aim to enhance the journal's interactivity and foster deeper connections with our audience. Beyond traditional research articles, we will introduce innovative formats, such as audio and video publications, offering researchers dynamic new ways to share their work. These updates will enrich reader engagement and cultivate a more vibrant, collaborative scientific community.

We warmly invite researchers, clinicians, and scientists worldwide to join us in this transformative era for RHYTHM. Your contributions whether through submissions, peer review, or partnerships will be pivotal in shaping the journal's future. Together, we can push the boundaries of cardiovascular science and translational medicine, driving meaningful progress in global healthcare.

With deepest gratitude for your continued support, we look forward to writing this next chapter with you.

Keep the RHYTHM, Save the LIFE!

Sincerely,

Abbasali Karimi, Editor-in-Chief

Ali Bozorgi, Senior Associate Editor

Payam Kabiri, Editorial Innovation Advisor
